

J-Tech A CONESYS COMPANY

J-Tech JTCIR Reverse Bayonet Monoblock Connectors

J-Tech has launched the JTCIR product line to support the needs of our industrial customers in the rail/mass transit, heavy equipment, factory automation, power generation, geophysical, and other heavy industrial markets. J-Tech has been making rugged harsh environment connectors for over 20 years. J-Tech is a 100% vertically integrated interconnect manufacturer, with an unwavering dedication to quality, service, and solutions for our customers.

J-Tech's JTCIR product line offers a wide variety of styles, plating options, rear accessories, and insert arrangements that are sure to fit our customer's requirements.

JTCIR Product Line offers:

- Easy, quick 1/3rd turn coupling
- Audible sound and visual yellow markings to confirm full engagement
- Water Resistant exceeding IP67 standards
- Standard Flame Retardant Neoprene to UL94V0
- Alternative rubber materials available
- Capable of handling solvents from both MIL-C-5015 and VG95234
- Interchangeable, Inter-mountable, and Inter-mates with other VG95234 connectors
- Available in aluminum or stainless steel
- Crimp and solder contacts, with gold or silver plating
- Meets shock and vibration requirements of MIL-C-5015
- Temperature rating of -40 degrees C to +125 degrees C

(Note: To offer flame retardant neoprene as standard material, J-Tech sacrificed a few degrees on the low end)
